SUMMARY

A former Senior Aircraft Maintenance Technician with over 4 years of experience in the aviation industry, and I have recently made a transition into the technology industry. Despite enjoying my time as a technician, I grew a strong interest in the technology industry and decided to pursue a career in software development. I enrolled in Hacktiv8's Full Stack JavaScript Immersive Program and spent 4 months developing my skills in modern web development technologies and tools, including React JS, Vue, Node JS, Express, PostgreSQL, GraphQL, MongoDB, and more. The bootcamp was an intensive and rewarding experience, and I am excited to apply my new skills and knowledge as a Full Stack Developer.
